

Pöytälevyt

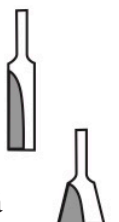

18 mm paksu mäntyinen liimapuulevy

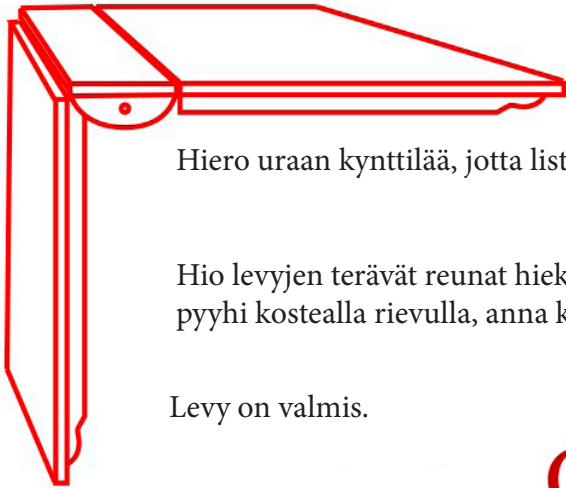

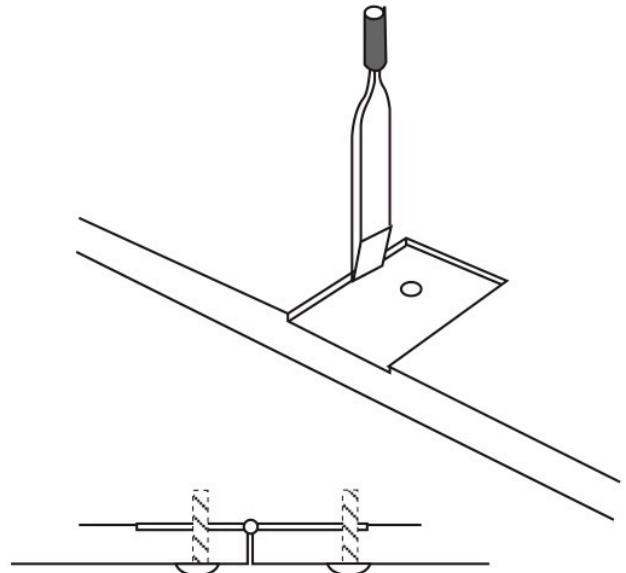

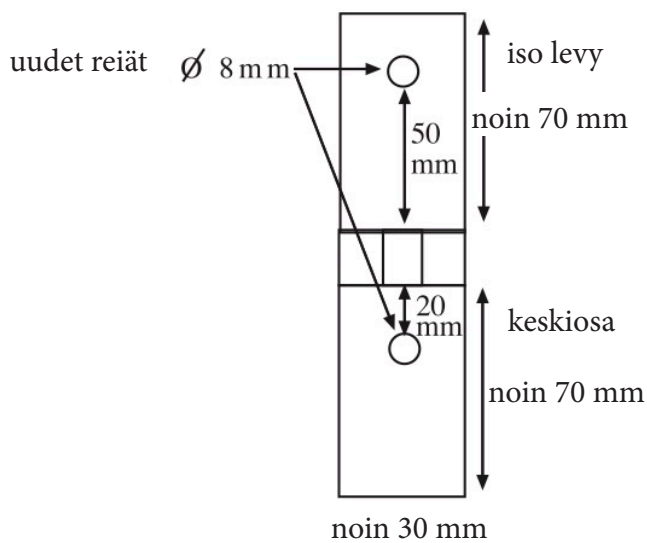

Šahaa pois 10 mm:n pala lohenvyörytyksestä, niin koriste
peittää jyrityn uran

Helpoin tapa on jyrsiä
ensin suoralla terällä

ja sitten lohenpyrstöterällä

Sarana

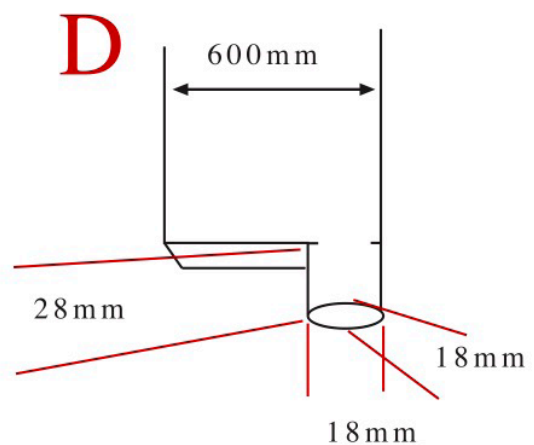

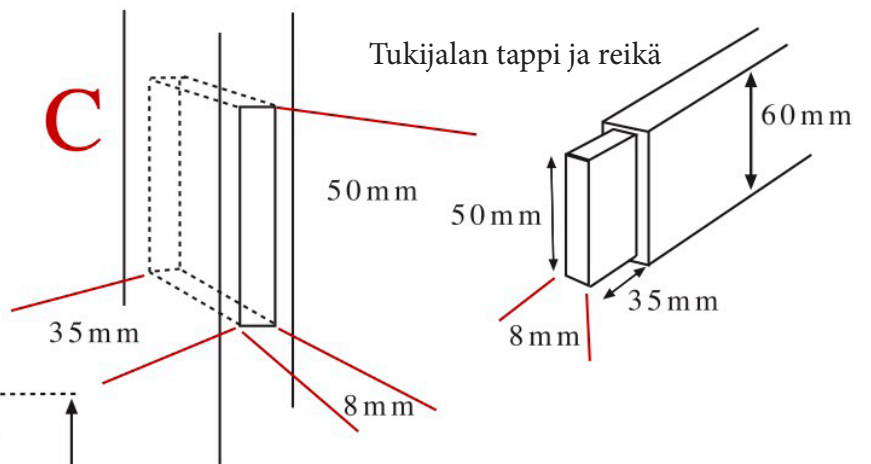

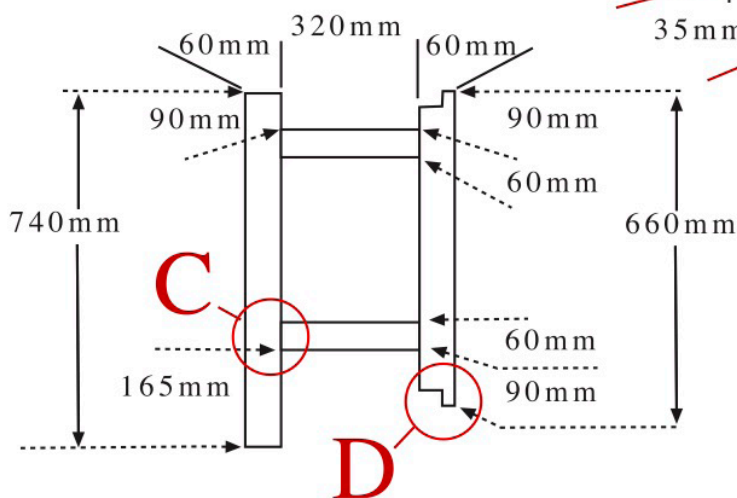

Hiero uraan kynttilää, jotta lista liukuu sinne helpommin. Liitoksen tulee olla tiukka.

Hio levyjen terävät reunat hiekkapaperilla. Hio kaikki levyt hiekkapaperilla numero 180, pyyhi kostealla rievulla, anna kuivua ja hio hiekkapaperilla numero 240.

Levy on valmis.

Tukijalka x4

Runko
